3.0

THEY'RE  
BACK

**TOGETHER**

**WE  
GET THEM  
READY**

**TOGETHER**

**WE ARE  
READY**

# Why Edea

We think differently,  
we start with the skater  
and design for performance.  
Edea means...

## **Greater Feel**

Skating is about feel.  
Edea designed  
to feel the edges.

## **Innovation**

Skating is  
about new.  
Edea means  
innovation.

## **Faster to perform**

Skating is about performance.  
Edea designed with shorter  
break-in time.

## **Lightweight**

Skating is  
about lightness.  
Edea think and  
design light.

## **Comfort**

Skating is about  
ice time. Step  
into Edea and  
feel the hug.

## **Sharper style**

Skating is about style.  
Edea designed with  
Italian style.

Skating is a sport about expression, where art meets performance.  
It is technique and style. Style is what Italians do.  
Step into the rink ahead of your rivals.

# Anti-Shock System

PERFORM LONGER, BE SAFER

## The problem

When landing, a force up to 8 times your weight sends shockwaves through your body. Even without jumps, ice chatter creates mini-stresses, both of these create negative energies that can lead to injuries.

**IMPACT**

## The solution

Edea's Anti-Shock System combines Noene to disperse and Poron to absorb these negative energies. Anti-Shock is integrated into the Piano and is available in Impact Insoles and Noene Anti-Shock Undersoles.

**SHOCK**

**(DISPERSA)**

## Edea Anti-Shock means

- Minimized impact shock protecting you from potential injury
- Absorbed ice chatter for smoother glide and a more solid base
- Increased stability on landings for quicker transitions and jumps
- Reduced strain on ankles, knees, hips and the back

# Piano

## **Smoother skating**

Dual layer anti-shock system reduces impact while increasing stability

## **Greater thrust**

New lateral support for quicker, increased power transfer

## **More control**

Improved heel pocket and extra tongue tabs give an improved foot position for better feel and quicker movement

## **More comfort**

Longer boot collar for greater movement range

## **Fresh skates**

Micro-perforated air tech lining for super quick drying

## **Increased flexibility**

through two piece tongue

## **Finishing touches**

Fashion sole and crystals

## **SUPPORT**

EXTRA STRONG

## **PERFORMANCE**

TRIPLE QUAD JUMPS\*

*Coming Soon!!*

Coming soon new **SMALLER** size for young skaters! (7 ½ to 8 ¾ free-style blades)

# E-guards

E-GUARDS EDEA

TRADITIONAL

## SUPPORT

Unique vertebrae profile to support blade hollow and protect edges

## ONE PIECE

no fiddling, no parts, no assembly. It **STRETCHES** to fit all sizes

## EASY WALK

wider rubberized grip makes walking easier with less slipping

## DESIGNED

to fits all blades types

## CUSHION

rubberized sole is softer and quieter.  
No more click-clack

## EASY CARE

superior drainage  
means drier blades  
and less rust

# E-Spinner

The new technical spinner with an improved rocker and new axis for a more realistic spin and take offs. Ideal for serious skaters to practise and perfect their moves off the ice. Patent pending.

BORA BORA

TOBAGO

HAWAII

FIJI

MAUI

COOK

BALI

BAHAMAS

## NEW PROFILE

Designed to mimic a blade to give it a more realistic feel. The new profile reduces friction and increase the feel of being on real ice. The taller rocker and blade profile combine to move the spinning point and create the perfect off-ice partner.

## TAKE OFF JUMPS BANDS

The special bands are to practice take offs. Two bands are included, a softer yellow one for singles and the red for doubles or triples. NOTE: Use without bands for spin practice.

SOFT BAND JUMPS

HARD BAND JUMPS

## THE NEW WAVE DESIGN

Makes it easier to practise as the platform is wider.

### ANTI-SHOCK SKATE UNDERSOLE

**LESS PAIN MORE GAIN**

Edea antishock undersole by Noene is specifically designed to improve skating by reducing impact shock and so improve performance.

Noene is scientifically proven to reduce shock and impact by redirecting and dispersing the energy. Our 1mm layer provides optimal performance benefit and maximum comfort while being lightweight and ventilated.

Edea antishock undersole by Noene

- reduces fatigue
- reduces impact shock
- reduces injury risk

**maximise your performance**

ODOR ABSORBERS

Edea innovation makes us better and different.  
This means we must be sized, fitted, shaped  
laced and mounted 'the edea way'

# Sizing

## THE PERFECT SIZE

In order to get  
the correct  
length you  
need to use  
the Edea  
measuring  
device.

## THE PERFECT FIT

90% of feet fit  
our C or standard  
width. Edea stretchers  
make the final  
adjustment to give the  
perfect custom fit.  
Non-standard  
widths are available  
on special request  
(B-narrow; D-wide;  
E-extrawide).

# Mounting

EDEA boots have thinner technical soles  
and need special tools and hi-low screws for  
mounting the blade.

## SET OF 100 HI-LOW SCREWS

Edea hi-lo screws are  
dual helix to increase hold.  
Do not use any other screw.

## ONE DRILL BIT EXTENSION 2,5 MM.

Specially measured  
drill bit holder ensures  
accurate depth of  
holes. 2,5mm drill bits  
are used for EDEA  
Hi-Low screws.

## PRE-CUT FILLERS

Essential for repositioning  
blades. Each pack includes  
25x2,5mm pre-cut carbon  
bars.

# Mounting stand

Stands for quick and precise blade mounting are practical and portable.
